

PULSE
ANILOX CLEANING

inkLink®

A lean, innovative solution for safe, stable and controlled ink circulation with easy handling and increased production output.

With inkLink a production increase of up to 30%, uniform quality and reduced consumption of resources will be experienced.

TRESU F10 iCon **Intelligent ink control system**

From pains to gains with F10 iCon.

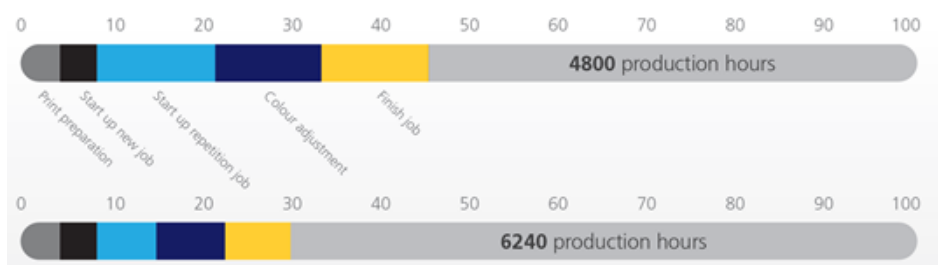

F10 iCon is part of the TRESU inkLink system that delivers uniform quality, less waste and reduced costs by effective process control from ink container to substrate.

- Automatic adjustment of parameters
- Automatic cleaning during job change
- No hoses to move
- Closed systems
- Touch screen
- No extra bucket
- Recipes
- Easy handling

Improvement of production time

ROI in less than five months

Reduced environmental impact

- inkLink closed system reduces evaporation up to 66%
- inkLink fastClean controls the cleaning process and reduces water use considerably
- inkLink fastClean reduces the needs for detergents while cleaning the system
